The screenshot shows the 'Results' tab in SQL Server Enterprise Manager. It displays a single row of data from the query 'SELECT * FROM Average_Impact_Factor_of_NorthShoreUniversity;'. The column is named 'AVG_ImpactFactor' and the value is '7.250000'.

	AVG_ImpactFactor
1	7.250000

6. Create Trigger to generate Unique ID for Researcher:

```

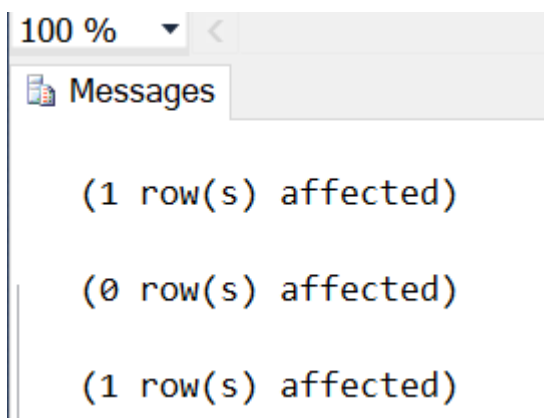

CREATE TRIGGER trg_ResearcherID
ON RESEARCHER FOR INSERT
AS
BEGIN
DECLARE @FamilyName varchar(64);
DECLARE @counter int;
DECLARE @ID varchar(66);
DECLARE @original varchar(66);
SET @FamilyName = (SELECT FamilyName FROM INSERTED);
SET @original = (SELECT ResearcherID FROM INSERTED);
SET @counter = CAST(CAST((SELECT COUNT(FamilyName) FROM RESEARCHER WHERE FamilyName =
@FamilyName) AS int)AS varchar(64));
SET @ID = CONCAT(UPPER(@FamilyName),RIGHT('0'+LTRIM(RTRIM(@counter)),2));
UPDATE RESEARCHER
SET ResearcherID = @ID
WHERE ResearcherID = @original;
DELETE FROM RESEARCHER WHERE ResearcherID = @original;
END

```

7. Test the Trigger:

```
INSERT INTO RESEARCHER(ResearcherID,FamilyName,GivenName,Title)
VALUES
('123466','Landon','Sam','Dr');
```

```
SELECT * FROM RESEARCHER;
```
